„A product range as if made from one piece“

The willingness to innovate and experiment is a decisive part of our corporate DNA

Barrier posts with the 3p-Technology developed by us have set new benchmarks. Today, the 3p-Technology is regarded as a standard fastening system in hundreds of towns and municipal facilities.

You can find everything you need to know about the advantages of this cost-reducing technology and its individual contribution to modern urban design in the current 2025 catalogue and in the online shop.

In addition, we will show you an extensive selection of trendsetting furniture and different equipment elements for public spaces that contribute to a sustainable environment worth living in.

From Borofix, the patented ground sleeve with clamping system, modularly expandable park benches and robust

picnic table combinations to a large selection of barrier posts with and without 3p-Technology, you will find a variety of meaningful solutions for your needs in our 2025 catalogue.

If you are facing specific challenges or need support in choosing the right urban furniture for your project, we are always happy to assist you. Your ideas and requirements are always our top priority. We offer free sampling, comprehensive telephone consultations and personal presentations directly at your site.

Put us to the test – we look forward to hearing from you!

Lutz Barich

Rotger Barich

Innovation and creativity

ABES was founded in 1994 and has been concentrating on the design of objects for public spaces since 1999.

ABES developed the 3p-Technology with a clear focus on customer needs. This technical innovation, which is now established as the standard fastening system in many towns and municipalities, enables the cost-effective, simple and time-saving repair of public furniture. The underlying concept: bollards and barrier posts are equipped with a special connector that contains a cast-in predetermined shear point. If force is applied, both the object and the foundation remain intact – only the connector is replaced on site.

ABES is also proving its innovative force in the urban furniture sector. The products we develop are distinguished by their individual design and unique character. They attract attention, inspire viewers and stimulate different opinions and discussions. This diversity is what makes the objects so appealing.

The North Rhine-Westphalia Design Centre has honoured this uniqueness and awarded the renowned «Red Dot Award» to the 450-1 bicycle rack (formerly Signum I) and the 001-1 bollard (formerly Metropol 520 5RK) with 3p-Technology.

ABES uses various high-quality materials for its products. In addition to galvanised or high-grade steel and selected, primarily native wood species, the company increasingly

relies on cast iron and aluminium. These materials offer special advantages that are difficult to achieve with conventional welding processes. Casting allows almost limitless design possibilities and gives the objects an appearance that is both modern and archaic at the same time.

In addition, casting is characterised by its high environmental friendliness. Around 95 % of the materials used originate from recyclable resources and the finished cast products can be recycled almost 100 % at the end of their lifecycle. The choice of this material contributes to the conservation of scarce resources and the avoidance of waste.

See the aesthetic and technologically innovative products from ABES for yourself.

WORTH KNOWING. INFORMATIVE. VERSATILE.

Online guidebooks and technical articles

Discover exciting, comprehensive articles on a wide variety of topics around urban planning and development. Our publications regularly offer you new insights into current projects, trends and innovative approaches that are shaping cities and towns sustainably. New editions are published at regular intervals and present practical solutions and inspiring ideas for a modern and future-oriented urban design.

Technical article

Bollards as traffic elements

If you are looking for simple but effective ways to ensure road safety in cities and towns or to demarcate a traffic-calmed area, bollards are a versatile, reliable and easy-to-implement solution. The barrier posts perform numerous important tasks in road traffic and help to make traffic safer.

BOROFIX:

Clamping rosettes & pair of ground sleeves for almost all ABES bicycle-stands made of round and rectangular tube and flat steel

- protected by European patent: EP 3 608 484 B1
- Ground socket available both round and square to match the leaning bracket

WASTE CONTAINER 523-2

129

- identical construction to model 523-1 with ashtray
- unlocking for emptying using a triangular key

RAM PROTECTION BOLLARD 672& 675

galvanised steel

68/69

- slightly cambered upper edge
- optionally fillable with concrete

ABES HEART 940 for hanging up love locks

161

- curved and welded steel construction
- welded-in corrugated round bars

BICYCLE STAND 478 with or without knee rail

150

BENCH TABLE COMBINATION 150 4 benches and 1 table

steel and robinia finger-jointed

BENCH TABLE COMBINATION 151 4 or 2 benches

110/111

- for dowelling or concrete embedment
- free standing possible

WASTE CONTAINER 510

127

- Available with or without ashtray
- with stand (optionally with 3p technology)

BICYCLE STAND 479

151

- mitre-cut
- HDPE plastic profile for material-friendly leaning

BOLLARD 098

58

BOLLARD 076-60

62

- an addition to bollard series 076
- sphere made of cast aluminium Ø 130 mm

BENCH 149-1/2

112

SCOOTER PARKER 400
Steel

152

- 10 x handlebar holder for scooter
- lockable with U-lock
- can be combined with ABES bicycle stand 453, 471, 472 and 474

BENCH 153
Steel + robinia finger-jointed

114

- Individually extendable

PAINT PROTECTION

153

- Protects the leaning bracket/bicycle rack and the bicycle from scratches and damage to the paintwork
- Ø 48 & 42 mm

WHAT YOU DON'T LIKE TO SEE

Crooked and knocked down bollards

You are certainly familiar with these pictures. Crooked or knocked over bollards can be seen in every city. No wonder, because replacing them involves an enormous amount of work. It takes several people several hours to repair them. This results in high costs.

WHAT YOU LIKE TO SEE

Bollard with 3p-Technology

The 3p-Technology from ABES is the solution. If the post is rammed or knocked over by a vehicle, the connecting piece with predetermined breaking point gives way in a targeted manner.

The bollard is knocked over by a vehicle.

The replaceable connecting piece breaks at the predetermined breaking point. The bollard and foundation with ground shell usually remain intact.

The broken connecting piece is replaced with a new one. The bollard can be reinstalled immediately.

More informations and videos:

* MAY 2025

The 3p-Technology and its individual parts

Standard:
**Clamping cone set
with hex head screw**
(3p-SPK-N1-N2-6K)

STANDARD

CLAMPING CONE SET with hex head screw

- Tightens the system firmly

Consisting of: M12 hexagonal head screw, N1 clamping cone without internal thread, N2 clamping cone with internal thread or N1 with M12 nut

Material: stainless steel 1.4301

Before installation, it's recommended to lubricate hex head screw and nut with a special ceramic paste. Please inquire! We will be happy to advise you.

Standard:
**Junction piece
without anti-roll device**
(000.008)

STANDARD

JUNCTION PIECE WITH PREDETERMINED BREAKING POINT without anti-roll device

- Links bollard to the ground shell
- Breaks at the predetermined breaking point when damaged by a vehicle
- Can be instantly replaced if damaged

Material: cast iron, galvanised

Standard:
Ground shell 300 mm
(000.001)

STANDARD

GROUND SHELL 300 mm (hybrid)*

- Extremely robust component for long-lasting concrete embedment

Material: cast iron, galvanised

Note: In order to prevent the interruption of the construction process, the ground shells can be delivered in advance, if requested.

* The hybrid ground shell can also be used for bollards with 3p-Snaplock (see page 17).

OPTIONS

3p-SPK-N1-N2-3K Clamping cone set with triangular head screw

3p-SPK-N5-N2-3K Clamping cone set with lengthened clamping cone (N5)
Additional protection with a padlock in order to prevent unauthorised removal (e.g. fire brigade padlock), possible use with triangular head screw or with hex head screw

3p-SPK-N1-N2-TR Clamping cone set with ABES bolt (Drop shaped)
Special head screw with drop shaped drive
Can only be opened with an optional special tools, inhence protection against unauthorised opening with standard tools (utility model protection)

3p-Accessories see page 172

**OPTIONS**

000.013 Junction piece with anti-roll device
The metal rod prevents the bollard from rolling away

000.015 Junction piece with steel spring (3p-Flex)
The bollard returns to its initial position after impact (8-10° tilt), and only breaks if the breaking load is exceeded

000.016 Junction piece with extended connection (3p-High)
Allows to open and close the locking mechanism with long fire brigade triangular keys without a break

000.034 Junction piece without predetermined breaking point
Solid protection for people and objects

000.041 Height-adjustable junction piece
· Height can be adjusted with a threaded rod
· Compensates for the gap between bollard and ground shell, if it ends below level, e.g. with paving stones of different heights

**OPTIONS**

000.003 Ground shell 500 mm (hybrid)*
For additional stability on unstabilised subsoil, cobblestone pavement etc.

000.007 Ground shell 100 mm
As special solution in case of small mounting depth, e.g. car parks, bridges etc.

Ground shell cover
Reduces risk of tripping, prevents soiling

000.002 Cast aluminium

000.050 S235 Steel with spring, hot-dip galvanised

The world of 3p-Technology

The 3p-Technology from ABES is an innovative fastening system for urban furniture.

The central element of the 3p-Technology is a hybrid ground shell, which enables the following fastening methods for barrier posts made of steel and cast aluminium:

- 3p-Technology (classic): connector with cast-in predetermined breaking point
- 3p snaplock: self-latching lock with cylinder or fire brigade triangular key

The unique advantage of the connector with a predetermined breaking point is the enormous reduction in cost, because the predetermined breaking point is designed to give way from a defined applied force. This results in a significant reduction in repair and maintenance work.

Important: with the 3p-Technology, both locking systems can optionally be used in the same ground sleeve. In addition, the systems are flexibly interchangeable with one another. That is the reason for the designation „hybrid ground sleeve“.

ABES manufactures barrier posts bearing the municipal coat of arms for many customers, which are available with a self-latching lock or predetermined shear point.

This design variety is unique worldwide with the 3p-Technology from ABES.

Neunkirchen (Saarland), Bollard 004

Different urban furniture on one and the same ground shell*

Almost all products with 3p-Technology are interchangeable with one another

- The connector can be fitted to any ground sleeve with 3p-Technology.
- All connectors and bolted connections are also interchangeable with one another, even subsequently.

Which products are also compatible with the ground sleeve beside the barrier posts?

- Waste bins
- Park benches
- Seating bollards
- Illuminated bollards
- Bollard ashtrays
- Park benches

Only 3p-Technology offers this much planning freedom.

More information: see page 17

**Hybrid ground shell*

ONE GROUND SHELL* TWO SYSTEMS

Optimised for fire brigade access roads

WITH PREDETERMINED BREAKING POINT

3p-High

Bolted connection at a convenient height

With all our bollards, the opening of the 3p-Technology can be moved further up. This makes it possible to open or close the lock with long fire brigade triangular keys without setting down. An extended connector is required for this variant. With small diameters, the taper sleeve may protrude.

Please contact us if you are in any doubt.

WITHOUT PREDETERMINED SHEAR POINT

3p snaplock

The snaplock system is the result of intensive development work: Barrier posts made of cast aluminium that can be fastened in the ground shell by simply snapping in.

The advantages at a glance:

- Simple removal of the bollard
- Unlocking with a locking cylinder or triangular lock on the bollard head
- The barrier post latches automatically when inserted
- Systems with snaplock mechanism are now available with a municipal coat of arms or logo

High flexibility due to hybrid ground sleeve with integrated snap-in spigot, on which 3p-Technology products with junction pieces can also be fastened.

More information: see page 17

Bundesanstalt für Straßenwesen (Federal Highway Research Institute)

Report n° V4 – 61/2002 dated Sep 13, 2002
on the

Characteristics of a bollard system regarding the effort required for repair

APPLICATION

Applicant: ABES Büro Deutschland
Zur Ehreneiche 3
57250 Netphen

Application date: 27 August 2002

Subject of application: Confirmation of the effort required to repair a damaged bollard

1 | Bollard before damage

2 | Damaged bollard

MATERIAL

Description*: **Metropol bollard with 3p-Technology including:**

- Ground shell n° 000.001, ductile cast iron GGG, embedded at ground level
- Junction piece, ductile cast iron GGG, with hexagon bolt and nut M12, stainless steel 1.4301, n° 000.008
- Clamping cone, stainless steel 1.4301, Nr. 000.004
- Anchor, galvanised steel ST37, n° 000.013
- Bollard, cast iron GG 20, n° 001.003

Serial number: None

Condition: New

*provided by applicant

3 | Bollard system after damage

The junction piece yields, the bollard falls over and is held to the ground shell by an anchor. The bollard itself, the ground shell and the foundations do not show any visible signs of damage (see figure 3).

The bollard is mounted with a new junction piece within 3 minutes (see figure 4 and figure 5). After repair, the bollard is firmly fixed in place.

4 | Junction piece: damaged (right) and replacement (left)

5 | Repairing the bollard

TEST

A properly installed Metropol bollard with 3p-Technology is damaged by a car (see figure 1 and figure 2).

03

BOLLARDS

Barrier posts and bollards are indispensable components of the urban infrastructure. They serve to delimit and mark roads and footpaths and play a crucial role in road traffic safety. Whether classic or modern, unobtrusive or conspicuous – ABES offers a suitable design to enable a harmonious overall picture to be achieved in any surroundings.

In order to cope with the challenges of daily road traffic that often place heavy loads on the bollards and cause high maintenance costs, ABES brought the 3p-Technology onto the market in 1999. This alternative to a fixed installation enables the fast, simple and inexpensive repair of damaged posts. The bollards are ready for use again immediately and the repair costs are significantly reduced.

Mounting variants

ABES 3p-Technology (standard)

*Standard system with junction piece
and predetermined breaking point*

3p-Technologie is by far the most frequently ordered type of mounting. It is used in more than 85% of cases, because it significantly reduces costs.

3p-Technology (standard)
(see pages 10–19)

3p-High

Fixed mounting

Screw-on

Fold-down*

*The embeddable fold-down version is currently available for the following bollards: 001, 010, 016, 027-1/-2, 031, 032, 059, 061

ABES 3p-Snaplock

Self-latching fastening system for bollards. Quick positioning into the ground shell, easy removal without bending over.

Easy and intuitive removal with little effort.

Bollards with junction pieces (3p-Technologie) fit in the same ground shell.

- Fastening system without predetermined breaking point
- Optionally with triangular lock or locking cylinder
- Supplied complete with hybrid ground sleeve* for setting in concrete
- Selected bollard models
- made of cast aluminium (also with cast-in coat of arms), available up to a diameter of 100 mm

* Suitable for the new 3p-Snaplock as well as for the proven 3p-Technologie.

Finishing variants

Paintwork, reflective tapes, finishings, eyelets, chains etc. are available on request.

1 ring — reflective tape

3 rings — reflective tape

1 ring — powder-coated

5 rings — powder-coated

With eyelets & chain

Stainless steel: smoothed,
grain 240 (standard)

Cat's eye reflectors

Door stopper

ABES 3p-Multiflange

Bollard fastening system using a screwed connection flange to a pad foundation.

Top: Threaded sleeve is set in pad foundation.

Bottom: Connecting flange is fastened to the threaded sleeve with an M12 hex head screw.

Bollard and connecting flange are firmly connected to each other by means of clamping cones and a screw (hexagonal, drop shape or triangular screw).

The flange plate gives way when force is applied, thus protecting the bollard and foundation, and is compatible with 3p technology. Concealed bolted connection: internal, not visible from the outside.

Cost-saving:

- point foundation suffices
- Flange can be exchanged quickly, bollard is reusable
- Paving usually remains intact
- Low storage costs

Your personal ABES bollard

Give your bollard an individual touch and customize it with your coat of arms, your company logo or useful pictograms!

- Applicable for all cast aluminium bollards if their geometry allows it.
- From a specific order volume, depending on the shape of the emblem, we bear the non-recurring costs for the mold. Afterwards, single bollards with emblem can also be ordered at list price.

**We assist you in designing your personal bollard.
Feel free to contact us!**

INDIVIDUAL. TOP QUALITY. EFFICIENT.

3 reasons for removable bollards with coat of arms/logo:

*Individual concept. Top quality processing.
Efficient maintenance costs.*

THE ABES CLASSICS

Design: hammer.runge.design

Special models

Cat's eye reflectors, one powder-coated ring or one ring of reflective tape (*f.l.t.r.*)

Also available for other models (*see pages 27 and 175 f.*)

WITH CYLINDRICAL BASE

CLASSICS

Cast aluminium

Specifications

Cylindrical cast aluminium bollard with a slightly domed top and a cylindrical base. Smooth or with one or three circumferential groove(s). (*See online shop for product-related texts*)

Mounting

Removable with 3p-Technologie
Alternative: concrete embedment

Finish

Powder coating in standard RAL colours or DB 703

Specifications

- 076-10** Cylindrical bollard made of galvanised steel with flat top.
- 076-20** Cylindrical bollard made of galvanised steel with slightly curved top.
- 076-30** Cylindrical bollard made of galvanised steel with round top.
- 076-40** Cylindrical bollard made of galvanised steel with a spherical top.
- 076-50** Cylindrical bollard made of galvanised steel with a circumferential ring below the round top.
- 076-60** Cylindrical bollard made of galvanised steel with a spherical top.

Mounting

Removable with 3p-Technology

Alternative: concrete embedment

Optional: with flange to enable screwing

Finish

- Steel S235, galvanised with powder coating in standard RAL colours or DB 703
- Stainless steel 1.4301 on request
- Suitable for multipurpose clips to fasten signs, bins, dog waste containers etc.
- Height can be adjusted on customer request

Note

The ground rosette is part of the delivery (for 3p-Technology)

Covers completely the ground shell

Material: S235 steel, hot-dip galvanised and powder-coated in bollard paint

BOLLARD 074

Stahl + Stainless steel | 1000 mm

Specifications

Square steel bollard with slightly pyramidal square top.

Mounting

Removable with 3p-Technologie

Alternative: concrete embedment

Finish

- Stainless steel 1.4301 smoothed, grain 240 on request
Optional: electropolished/high-gloss
- Steel S235, galvanised with powder coating in standard RAL colours or DB 703
- Height can be adjusted on customer request

Note

The ground rosette is part of the delivery (3p-Technologie)

Completely covers the ground shell

Material: S235 steel, hot-dip galvanised and powder-coated in bollard paint

RAILING SYSTEMS WITH 3P-TECHNOLOGY

Bollards with connection for railings

Bollards are often placed where vehicles are not supposed to go.

Their main functions include:

- **SEPARATING:**
Footpaths from roadways
- **CHANNELLING:**
Directing the movement of crowds, cyclists, vehicles
- **PROTECTING:**
Prevent people from entering roadways carelessly or unknowingly at blind spots

Bollards as a stand-alone product in conjunction with railing systems complement each other in many parts of the cityscape, because they make the composition of the street furniture appear more homogeneous.

Based on the 3p-Technology fastening system, we have developed two different connections:

RAILING-SYSTEM 1

For selected cast aluminium bollards
(e.g. all ABES Classics, see p. 30ff)

RAILING-SYSTEM 2

For cylindrical steel or cast aluminium bollards

**FOR CAST ALUMINIUM BOLLARDS****RAILING-SYSTEM 1**

Railing-Bollard 027-7 | end bollard – cast aluminium

Railing-Bollard 027-8 | center bollard – cast aluminium

Railing 810 | set of railing tubes – steel

Railing-System 1 is only possible with cast aluminium bollards because the locating hole for the railing tube is moulded as an integral component into the bollard. As a matter of principle, the shape of the bollard must be suitable for this locating hole, i.e. it should have a cylindrical, rectangular or flat shape (examples: 001, 008, 009, 010, 016, 027, 043 among others).

Advantages at a glance

- ABES bollard models already integrated in the urban landscape can be used.
- Railing tubes can be cut to the required length on the construction site or on request as needed.
- After inserting the tubes into the locating holes, these can be fixed in situ if required, for example using grub screws.
- The barrier can be extended as required (modular).
- The bollards can be customised if desired with a moulded municipal coat of arms or logo.

**FOR STEEL OR CAST ALUMINIUM BOLLARDS****RAILING-SYSTEM 2**

Railing 850 | with vertical truss bars – steel

Railing 851 | with diagonal truss bars – steel

Railing-System 2, consisting of at least two end-to-end cylindrical ABES bollards* with 3p-Technologie, acting as railing end bollards or centre bollards using two or four horizontal and angle-adjustable universal brackets. This means that they can be used on one or more sides for an ABES Railing 850 or 851.

Advantages at a glance

- Can be attached to all straight, non-conical bollards.
- Most ABES bollard models can be subsequently fitted with corresponding supports.
- Changes of direction between 2 bollards of up to approx. 150° are possible using the articulated joint.
- The barrier can be extended as required (modular).
- On aluminium bollards if desired with a moulded municipal coat of arms or logo.
- Individual truss bars on request.

**Configure your own

FOR CAST ALUMINIUM BOLLARDS

RAILING-SYSTEM 1

Specifications

RAILING-BOLLARD 027-7 (end bollard)

Cylindrical bollard with a groove at the top and a cylindrical base with two casted circular tube sockets for the connection of an ABES railing 810 on one side.

RAILING-BOLLARD 027-8 (center bollard)

Cylindrical bollard with a groove at the top and a cylindrical base with four casted circular tube sockets for the connection of an ABES railing 810 on two sides.

RAILING 810 (railing tubes)

Set of two steel tubes Ø 48 mm, 2000 mm length, to connect to ABES Railing-Bollards 027-7 or 027-8.

Mounting

Removable with 3p-Technology

Alternative: concrete embedment or with self-engaging 3p-Snaplock fastening system

Finish

Powder coating in standard RAL colours or DB 703

Notes

- Railing-bollards 027-7/-8 identical with bollard 027-2
- Also available for other cast aluminium bollards (e.g. all ABES Classics, see page 30ff).
- The shape of the bollard must be suitable for this locating hole, i.e. it should have a cylindrical, rectangular or flat shape.

027-7

027-8

810

3p Technologie

◀ Bollard models (here bollard 027-2 with Heidelberg coat of arms) already integrated in the urban landscape can be used.

▼ System extendable as required.

FOR STEEL OR CAST ALUMINIUM BOLLARDS

RAILING-SYSTEM 2

Specifications

RAILING 850 (with vertical truss bars)

Railing 850, consisting of a frame made of 50 × 50 × 2 mm flat steel with Ø 12 mm vertical steel truss bars, powder-coated in standard RAL or DB 703 glimmer grey, as well as two lugs for the fixation with screws on each side, supported by two ABES bollards* by means of two universal supports on each side.

Mounting

Universal support with adjustable angle

Finish

Powder coating in standard RAL colours or DB 703

Note

The illustration shows Railing 850 fastened to two removable ABES Bollards 042-1 (see pages 60-61).

Specifications

RAILING 851 (with diagonal truss bars)

Railing 851, consisting of a frame made of 50 × 50 × 2 mm flat steel with Ø 12 mm diagonal steel truss bars and a centered circle-shaped rolled flat steel ornament, powder-coated in standard RAL or DB 703 glimmer grey, as well as two lugs on each side, supported by two ABES bollards* with dedicated universal supports.

Mounting

Universal support with adjustable angle

Finish

Powder coating in standard RAL colours or DB 703

Note

The illustration shows Railing 851 fastened to two removable ABES Bollards 042-1 (see pages 60-61).

3p Technologie

Most ABES bollards with 3p-Technologie can be used.

► Supports included in delivery can be subsequently fastened to existing bollards.

▼ The angle of the railing to the bollard is variable.

*Bollards not included in delivery

FUNCTIONAL BOLLARDS & ILLUMINATED BOLLARDS

The ABES functional bollards are the specialists among the barrier posts. They not only perform the usual tasks of demarcating public open spaces, but also supply town squares and pedestrian zones with power, water and light. Like all bollards from the ABES product range, they meet the highest demands for design and looks – and prove to be elegant all-rounders (for urban life).

Different aspects have to be considered when it comes to urban lighting, because light design is faced with demanding challenges everywhere: Basically, however, it's about orientation and safety. In addition, light has become a major element of urban design.

- Suitable for playgrounds and sports fields

BOLLARD 026

026-1 | Rubber granulate | 600 mm

026-2 | Rubber granulate | 900 mm

Specifications

Dual waisted bollard made of rubber granulate with a distinct top, middle and base section.

Mounting

Removable with 3p-Technology

Alternative: concrete embedment

Finish

- Rubber granulate (anthracite)
- Available colours (not RAL): reddish-brown (see photo), grey, green

Type F sockets included in delivery are fitted on site into the openings provided.

CHARGING-BOLLARD 665 with 3 sockets

Steel | 900 mm

Specifications

Rectangular steel bollards with a flat locking top part, prepared for fitting three Type F sockets (each 230 V, 16 A, IP54) for connecting e-bikes, for example.

Mounting

With flange to enable screwing

Finish

- Steel S235, galvanised with powder coating in standard RAL colours or DB 703
- Height can be adjusted on customer request

Technical information

with regard to a Type F (Schuko) socket

Power supply:	230 Volt DC
Power rating:	16 A
IP Code:	IP54

Note

- Electrical configurations on demand at an additional cost.
- Other technical components, such as a residual-current circuit-breaker (FI), controls or cables, are not included in the scope of delivery.
- The fuse protection and connection must be carried out on site by a specialist firm (trained personnel).

LED – BLAZING ROLE MODELS

The LED lighting bollards 210, 220, 230 and 240 are setting an example in matters of energy consumption. With a power consumption of less than 4 watts per hour, they significantly reduce the urban electricity costs compared to conventional light sources.

All these models are available with 3p-Technology only.

LIGHTING-BOLLARD 210 LED

Cast aluminium | 870 mm

Specifications

Fully cylindrical lighting bollard made of cast aluminium with a flat top. With LED lighting in the head section, 2 LED strips each with 14 LEDs and Perspex diffuser (PMMA). Operated with 24 V extra-low voltage, 2 m connector cable with plug coupling in the base. IP Code IP67.

Mounting

Available only with 3p-Technology

Finish

Powder coating in standard RAL colours or DB 703

Technical information

- Light unit: 2 LED strips, each with 14 LEDs
- Power supply: 24 Volt DC
- Power input: 4 W
- Luminous flux: approx. 430 lm
- Beam angle: vertical 360°, horizontal approx. 120°
- Light colour: 6000 K, 4000 K or 2700 K
- IP Code: IP67

Note

- Including power cable, consisting of a bollard-sided cable with a plug (IP67, 50 cm) and a ground-sided cable with a socket (IP67, 150 cm).
- Technical components for power supply and control are not included. The connection has to be made by the customer.

Identical with Bollard 031-1, see page 34

For more information, please scan the QR code or visit www.abes-online.com.

No risk of
electric shock
due to low 24 V
voltage

ADVANTAGES AT A GLANCE

- Significantly lower power consumption by LEDs
- Considerably longer life than conventional light sources
- LED unit is replaceable
- No risk of electric shock, since safety extra-low voltage
- The junction piece can be replaced in a few minutes only
- Quick disassembly for short-term space requirements
- Ground shell can be covered, therefore no risk of tripping

LIGHTING-BOLLARD 220 LED

Cast aluminium | 180 · 600 mm

Specifications

Fully cylindrical lighting bollard made of cast aluminium with a flat top. With LED lighting in the lower section, 1 LED strip of 21 LEDs and acrylic glass diffuser (PMMA). Operated with 24 V extra-low voltage, 2 m connector cable with plug coupling in the base. IP Code IP67.

Mounting

Available only with 3p-Technologie

Finish

Powder coating in standard RAL colours or DB 703

Technical information

- Light unit: 1 LED strip of 21 LEDs
- Power supply: 24 Volt DC
- Power input: 3 W
- Luminous flux: approx. 320 lm
- Beam angle: vertical 360°, horizontal approx. 120°
- Light colour: 6000 K, 4000 K or 2700 K
- IP Code: IP67

Note

- Including power cable, consisting of a bollard-sided cable with a plug (IP67, 50 cm) and a ground-sided cable with a socket (IP67, 150 cm).
- Technical components for power supply and control are not included. The connection has to be made by the customer.

Lighting-Bollard 265 LED-B

LIGHTING-BOLLARD 266 LED*Steel | 900 mm***Specifications**

Square steel bollard with a flat top and a vertical LED light strip (650 mm) on two opposite sides. Each with 2 LED strips, acrylic glass (PMMA) diffuser, operated using 24 V safety extra-low voltage, 2 m connector cable with plug socket at the base of the bollard. IP Code IP67.

Mounting

Removable with 3p-Technology

Optional: with flange to enable screwing

Finish

- Steel S235, galvanised with powder coating in standard RAL colours or DB 703
- Stainless steel 1.4301 on request
- Height can be adjusted on customer request

Technical information

- Light unit: 2 LED strip (650 mm)
- Power supply: 24 Volt DC
- Power input (max.): approx. 2 × 8.5 W
- Luminous flux (max.): approx. 2 × 430 lm
- Beam angle: 120°
- Light colour: RGB + 4000 K
- IP Code: IP67

Note

- Including power cable, consisting of a bollard-sided cable with a plug (IP67, 50 cm) and a ground-sided cable with a socket (IP67, 150 cm).
- Technical components for power supply and control are not included. The connection has to be made by the customer.
- The ground rosette is part of the delivery (for 3p-Technology)
Completely covers the ground shell
Material: S235 steel, hot-dip galvanised and powder-coated in bollard paint

Identical with Bollard 066, see page 65

For more information, please scan the QR code or visit www.abes-online.com.

3p-Technologie

LIGHTING-BOLLARD 267 LED*Steel | 1060 mm***Specifications**

Fully cylindrical lighting bollard made of steel with a flat top. Lighting unit, consisting of a light fixture with 4 LED strips and a diffuser made of satined acrylic glass. Operates with 24 V safety extra-low voltage. 2 m power cable with plug and socket coupling in the lower part of the bollard. IP Code IP67.

Mounting

Removable with 3p-Technology

Optional: with flange to enable screwing

Finish

- Steel S235, galvanised with powder coating in standard RAL colours or DB 703
- Stainless steel 1.4301 on request
- Height can be adjusted on customer request

Technical information

- Light unit: 4 LED strips with a length of approx. 30 cm each
- Power supply: 24 volt DC
- Power input (max.): 11,5 W
- Luminous flux (max.): approx. 960 lm approx. 960 lm (lighting unit, without diffuser)
- Beam angle: 360°
- Light colour: 4000 K (white)
- IP Code: IP67 at the base

Note

- Including power cable, consisting of a bollard-sided cable with a plug (IP67, 50 cm) and a ground-sided cable with a socket (IP67, 150 cm).
- Technical components for power supply and control are not included. The connection has to be made by the customer.

BENCHES & TABLES

Park benches offer passers-by a welcome opportunity to rest and relax, and for that reason they need to be comfortable. They are located in green spaces, parks and squares, and enhance the urban space with their aesthetic appearance. In public areas, however, the bench is not just a place to rest or a viewing point. It enriches the inner city, because it brings together people from different generations and stimulates communication between them.

Park benches from ABES impress with tasteful, robust steel, stainless steel or cast aluminium frames which, in combination with wood, cast aluminium, steel and stainless steel seat rests, create elegant outdoor furniture. The weatherproof material and the sturdy fastening to the ground protect the benches against vandalism and allow them to remain outside all year round.

Every bench is also available without wood (except lean-on bench 108 and lounger 1.120). Blueprints for the wooden slats are then part of the delivery.

BENCH 141

Steel

141-1 | without back rest

141-2 | with back rest

Specifications

Bench 141-1 without back rest, consisting of two semi-circular steel side parts capable of holding five wooden slats ending level with the steel frames.

Bench 141-2 with back rest

Optionally includes a back rest consisting of three wooden slats connected to steel girder.

Mounting

Screw-on

Finish

- Steel S235, galvanised with powder coating in standard RAL colours or DB 703
- Wooden supports made of robinia wood, Douglas fir or meranti
- The following changes are possible for an extra price: colour, length and wooden surface

Design: Stefan Wehrmann 3Design

COMBINATION BENCH AND PICNIC TABLE 150

Steel

Specifications

Seating group consisting of four benches (please specify the number in tenders) and one table, made of mitre-welded steel profiles, in which the benches are bolted to the table in an L-shape at a 90° angle. Wooden laths are installed with a flush fit in the table and benches.

Finish#

- Steel S235, hot-dip galvanized or hot-dip galvanized with powder coating in standard RAL colors or DB 703
- Wood type: finger-jointed robinia (weather-resistant, European hardwood)

Mounting

for free-standing or screwing on (at +/- 0 mm)

For more information, please scan the QR code or visit www.abes-online.com.

2025

COMBINATION BENCH AND PICNIC TABLE 151

Steel

Specifications

Seating group consisting of four or two benches (please specify the number in tenders) and one table, made of mitre-welded steel profiles. Wooden laths are installed with a flush fit in the table and benches. Depending on the circumstances, the individual elements can be installed individually and are either bolted on or set in concrete.

Mounting

Screw-on (at +/- 0 mm) or concrete embedment

Finish

- Steel S235, hot-dip galvanized or hot-dip galvanized with powder coating in standard RAL colors or DB 703
- Wood type: finger-jointed robinia (weather-resistant, European hardwood)

For more information, please scan the QR code or visit www.abes-online.com.

BENCH 149

Steel + Stainless steel

149-1 | without backrest

149-2 | with backrest

Specifications

Park bench 149-1 without backrest

Bench without backrest, consisting of a pair of frames with semi-circular side parts made of sheet steel to accommodate the curved seat without backrest, as well as round bars welded to two sheet steel girders and connected to the pair of frames.

Park bench 149-2 with backrest

Bench with backrest, consisting of a pair of frames with semi-circular side parts made of sheet steel to accommodate the curved seat with backrest, as well as round bars welded to two sheet steel girders and connected to the pair of frames. They form an angle of approximately 90° to each other.

Mounting

for free-standing or screwing on (recommended)

Finish

- Steel S235, galvanised with powder coating in standard RAL colours or DB 703
- Other colours and lengths available on request at a surcharge

For more information, please scan the QR code or visit www.abes-online.com.

WASTE CONTAINERS

Waste bins are indispensable for a cultivated townscape. The models from ABES impress with both sophisticated functionality and attractive design, and blend effectively into the townscape.

Some of the robust, vandalism-resistant bins are equipped with a cover that prevents rainwater from entering and at least makes it more difficult to dump unwanted household waste. Separate internal containers simplify emptying and guarantee hygienic waste disposal.

Various models are compatible with the fastening system with 3p-Technology, allowing their easy removal at all times.

ST

3p-Technologie

**ADVANTAGES AT A GLANCE**

- Waste container stands completely firm without moving
- Due to its solid shell, the container generally remains undamaged after an impact
- Over 90% cost reduction for repairs
- Junction piece can be replaced in less than 3 minutes
- Only one call-out – reduced staff and vehicle costs
- Repair work does not have to be done on site
- Quick to disassemble if more space is needed at short notice
- Ground shells can be locked to prevent risk of tripping

**WASTE CONTAINERS WITH 3P-TECHNOLOGY****Practical and stylish**

This type of waste container combines functionality with design. Its classic cylindrical shape fits into any cityscape.

Its strong outer shell is extremely damage-resistant and also provides enough space for signs or billboards. When combined with the optional 3p-Flex junction piece, the waste container is even more resistant to everyday (traffic) inconveniences.

3p-Technologie

- **ABES Waste-Containers equipped with 3p-Technology are always removable. They can easily be carried to different locations (e.g. the building yard) for cleaning or maintenance work.**

SCOOTER &
BICYCLE-STAND

The bicycle stands from ABES combine function with modern design. The stable hoops hold the bicycles securely and protect them effectively against tipping over or bent wheel rims. At the same time, the holders enable secure locking to prevent theft.

The ABES 450-1 bicycle stands has been awarded the renowned „Red Dot Award“ by the NRW Design Centre for its outstanding design quality.

Thanks to their aesthetic design, the 450-1 and 450-2 models blend harmoniously into the townscape and make an attractive eye-catcher. The tube construction can optionally be equipped with a curved cover plate. This prevents the bicycles from inadvertently rolling out and ensures that they can be parked securely so that other road users are not endangered.

Bicycle stands recommended by the ADFC

Finding the right model among a large selection of bicycle stands is mostly not easy. In order to define a common standard for bicycle parking facilities, the "Allgemeine Deutsche Fahrrad-Club" (ADFC) has summarized certain criteria in a certification.

Even though our bicycle stands have proven themselves in all imaginable situations over the past 25 years, from this year we are offering bicycle parking racks that have received a recommendation including a test number after a certification process by the ADFC.

On the topic of cycling, the ADFC is considered as an institution in Germany. As an interests group, it is committed to the consistent promotion of bicycles in road traffic. Furthermore, the association supports manufacturers in the development of serviceable products related to bicycles. The ADFC experts have also made recommendations for bicycle parkers which are all met by our ADFC

recommended bicycle stands: they are easy to use and are suitable for a wide range of bike models. They also offer the option of securing bikes on both the front and the rear wheel. Furthermore, the ADFC certified bicycle stands are protected against vandalism, offer extra space between the individual bikes and are no hazardous obstacle for pedestrians. Last but not least, their design prevents the handlebar of the bike to turn, even with strong cross winds, and provides a stable and secure stand even in poor conditions.

See for yourself the advantages of our ADFC recommended bicycle stands – you will find the entire range on the following pages.

SINGLE-SIDED WHEEL POSITION

BICYCLE-STAND 480

BOROFIX

Steel + Stainless steel

Specifications

SINGLE RACK

Bicycle stand with single-sided bike support made of triple bent steel tube with a tube diameter of 42 mm. Lateral steel bar construction to store one bicycle with the front wheel at a 90° angle. Inward eyelet for attaching a bicycle lock.

RACK ROW SYSTEM

Bicycle-Stand 480 as rack row system with single-sided bike support, consisting of two, three or four bicycles-stands 480 with single-sided bike support with low/low or alternating low/high bike support heights that are screwed on trapezoidal rails. Each bicycle stand is made of a triple bent steel tube with a tube diameter of 42 mm and has a lateral steel bar construction to store one bicycle with the front wheel at a 90° angle. Inward eyelet for attaching a bicycle lock.

Using row connectors, several rack row systems of 2, 3 or 4 racks can be joined together to form a continuous system of any length.

Mounting

Single rack: For concrete embedment or removable with BOROFIX (page 154/155)

Rack row system: For screwing onto trapezoidal rails at +/- 0 mm.

Finish

- Stainless steel 1.4301 smoothed, grain 240
Optional: electropolished/high-gloss
- Steel S235, galvanised with powder coating in standard RAL colours or DB 703
- Other colors, different rack spacings or bike support angles are possible on demand.

Features

- Suitable for all bicycles with a tire width up to 60 mm.
- Rack spacing according to the recommendation of the ADFC: with low/low bike support heights 700 mm, with low/high bike support heights 500 mm
- ADFC recommended quality according to DIN79008, Quality Label Test Number Q2103, 04/2021

Specifications

DOUBLE SIDED

Bicycle stand with double-sided bike support made of triple bent steel tube with a tube diameter of 42 mm. Two lateral steel bar constructions to store two bicycles with their front wheels at a 90° angle opposite to each other. Inward eyelets for attaching bicycle locks.

RACK ROW SYSTEM

Bicycle-Stand 480 as rack row system with double-sided bike support, consisting of two, three or four Bicycles-Stands 480 with double-sided bike support with low/low or alternating low/high bike support heights that are screwed on trapezoidal rails. Each bicycle stand is made of a triple bent steel tube with a tube diameter of 42 mm and has two lateral steel bar construction to store two bicycles with their front wheels at a 90° angle opposite to each other. Inward eyelets for attaching bicycle locks.

Using row connectors, several rack row systems of 2, 3 or 4 racks can be joined together to form a continuous system of any length.

Mounting

Double sided: For concrete embedment, for screwing on or removable with BOROFIX (page 154/155)

Rack row system: For screwing onto trapezoidal rails at +/- 0 mm.

Finish

- Stainless steel 1.4301 smoothed, grain 240
Optional: electropolished/high-gloss
- Steel S235, galvanised with powder coating in standard RAL colours or DB 703
- Other colors, different rack spacings or bike support angles are possible on demand.

Features

- Suitable for all bicycles with a tire width up to 60 mm.
- Rack spacing according to the recommendation of the ADFC: with low/low bike support heights 700 mm, with low/high bike support heights 500 mm
- ADFC recommended quality according to DIN79008, Quality Label Test Number Q2103, 04/2021

**BICYCLE-STAND 480***Steel + Stainless steel*

◀ Suitable for all bicycles with a tire width up to 60 mm.

▶ Inward eyelet for attaching a bicycle lock.

◀ Rack row system on trapezoidal rails with single-sided bike support.

▶ Finishing examples:

- ① Steel S235, galvanised with powder coating in DB 703
- ② Steel S235, galvanised
- ③ Stainless steel 1.4301 smoothed, grain 240

▼▶ No contact of painted bike parts with the stable main stand due to inclined wheel position.

▲ Double or triple row system, can be combined as needed with row connectors.

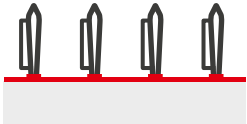

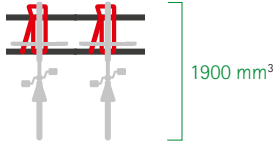

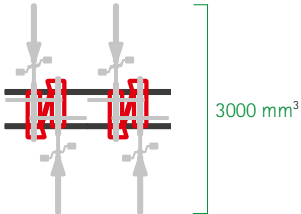

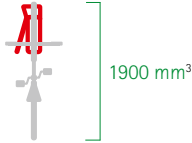

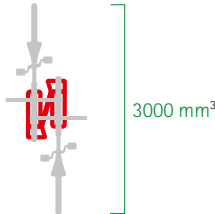

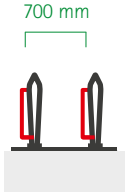

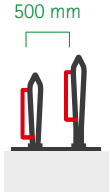

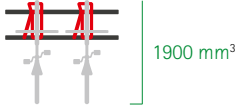

◀ Wheel position low/high for space-saving parking: ADFC-recommended wheel base 500 mm (in case of low/low: 700 mm).

▶ Storage depth for wheel position on both sides approx. 3000 mm.

CONFIGURATION ASSISTANT for bicycle stands recommended by the ADFC

Six simple steps to the desired configuration.

STEP 1: FASTENING			
FOR SCREW FIXING Single racks in a row – mounted on trapezoidal rails ¹ 		FOR CONCRETE EMBEDMENT Single rack 	
STEP 2: SINGLE OR DOUBLE SIDED BIKE SUPPORT			
SINGLE SIDED One bike support per rack 	DOUBLE SIDED Two bike supports per rack 	SINGLE SIDED One bike support per rack 	DOUBLE SIDED Two bike supports per rack 
STEP 3: BIKE SUPPORT HEIGHT			
LOW/LOW Rack spacing recommended by the ADFC: 700 mm 	LOW/HIGH Rack spacing recommended by the ADFC: 500 mm 	LOW Free arrangement ² 	HIGH Free arrangement ² 
STEP 4: BIKE SUPPORT ANGLE			
Available only for single sided and low/low configuration 45° LEFT ergonomically recommended 		45° RIGHT 	90° 
		FREE CHOICE OF ANGLE FOR SINGLE RACK Determined by the client 	
STEP 5: CHOICE OF MATERIAL			
ST STEEL S235, GALVANISED	ST STEEL S235, GALVANISED AND POWDER-COATED	AISI STAINLESS STEEL 1.4301	
STEP 6: NUMBER OF RACKS			
Single side option: One bike support per rack Double side option: Two bike supports per rack			

¹Extended version for underground bolting on request ²ADFC recommended rack spacing: 700 mm or 500 mm ³Storage depth for common bikes with a total length of approx. 1900 mm

MODULAR. INNOVATIVE. FLEXIBLE.

Racks in a row: Bicycle stands on trapezoidal rails for dowelling

For nearly all ABES bicycle racks and stands, we are now offering the bike stand option as racks in a row on trapezoidal rails.

There is a choice of row systems with 2, 3 or 4 stands. All other system sizes can be configured by linking them together using the series connectors developed for this purpose

Use the online configurator in our online shop to put the required system together.

All the single stands marked with this symbol can be supplied as a row system on trapezoidal rails.

*Exceptions: 400, 453 LED, 450-2, 451, 472, 474, 476, 477, 479, 690, 691

Trapezoidal rail

Double or triple row system, can be combined as needed with row connectors.

BICYCLE-STAND 453 BOROFIX

Steel + Stainless steel

Specifications

U-rack made of perpendicular steel profiles (rectangular profile 50 × 20 mm mitre-cut), optionally with knee rail.

For mounting see page 141

BICYCLE-STAND 453 LED BOROFIX

Steel + Stainless steel

Specifications

Bike rail made of right-angled steel profiles with LED strip on the underside of the cross tube (50 × 20 mm rectangular profile, mitre-cut). Operated with 24 V low voltage, 2 m connector cable with plug socket at the base of the rail. IP Code IP67, optionally with knee rail.

Technical information

LED strip (approx. 25 × 655 mm) on the underside of the cross tube

Power supply:	24 Volt DC
Power input:	ca. 6,7 W
Luminous flux:	approx. 560 lm
Beam angle:	120°
Light colour:	2700 K, 3000 K or 4000 K (2400 K, 5000 K, 6000 K available without surcharge)
Light output:	CRI > 90
IP Code IP67:	IP67
Connector cable:	approx. 2 m

Note

- Including power cable, consisting of a bollard-sided cable with a plug (IP67, 50 cm) and a ground-sided cable with a socket (IP67, 150 cm).
- Technical components for power supply and control are not included. The connection has to be made by the customer.

The LED unit is available as a spare part and be replaced in case of damage.

Usable side by side
as a handrail or railing
(see page 165)

Mounting

- removable with BOROFIX (page 154/155)
- concrete embedment
- version with two flanges to enable screwing
- **Can also be supplied as a row system on trapezoidal rails (without LED)**
(see page 138)

Finish

- Stainless steel 1.4301 smoothed, grain 240
Optional: electropolished/high-gloss
- Steel S235, galvanised with powder coating in standard RAL colours or DB 703
- Other colours available on request at a surcharge
- Profile dimensions, heights and widths other than specified are available on request and at an additional cost
- Optionally with knee rail

476 BOROFIX

477 BOROFIX

BICYCLE-STAND 450-1

Steel + Stainless steel

Specifications

Frame made of bent steel tubes with a 42.4 × 2.5 mm diameter, a vertical rear tube, and mutually offset tube ends.

		Bicycle stand	Cover plate (optional)
450-1	Steel S235, galvanised	450.001	455.001
450-1	Steel S235, powder-coated	450.011	455.011
450-1	Stainless steel 1.4301	450.002	455.002

Ground shell for removable model: 456.002

BICYCLE-STAND 450-2

Steel + Stainless steel

Specifications

Frame made of bent steel tubes with a 42.4 × 2.5 mm diameter, an overhanging rear tube, as well as mutually offset tube ends.

		Bicycle stand	Cover plate (optional)
450-2	Steel S235, galvanised	450.003	455.001
450-2	Steel S235, powder-coated	450.013	455.011
450-2	Stainless steel 1.4301	450.004	455.002

Ground shell for removable model: 456.002

Design: hammer runge design

BICYCLE-STAND 451

Steel + Stainless steel

Specifications

Frame made of bent steel tubes with a 42.4 × 2.5 mm diameter and parallel tube ends.

		Bicycle stand	Cover plate (optional)
451	Steel S235, galvanised	451.003	455.003
451	Steel S235, powder-coated	451.013	455.013
451	Stainless steel 1.4301	451.004	455.004

Ground shell for removable model: 456.003

Mounting

- Concrete embedment (only one foundation required)
- Alternative: removable with ground shell
- Optional (only 450-1): Also available as a row system on trapezoidal rail (see page 138)

Finish

- Stainless steel 1.4301 smoothed, grain 240
Optional: electropolished/high-gloss
- Steel S235, galvanised with powder coating in standard RAL colours or DB 703
- Other colours available on request at a surcharge

Note

For the removable version, the cover plate is needed.

BICYCLE-STAND 450 | 451

Sample configurations

These examples for designing parking areas with the ABES Bicycle-Stand 450 or 451 may serve as inspiration for the variety of configuration options.

1 Bicycle-Stand 450-1 row configuration

Powder-coated,
DB703 glimmer grey

2 Bicycle-Stand 450-1

Powder-coated,
DB703 glimmer grey

3 Bicycle-Stand 450-2

Powder-coated,
DB703 glimmer grey

2

Note

The division into segments of 2 or 3 racks and the row connector allow the installation of any number of racks to create a row parking facility.

BICYCLE-STAND 450-1 row configuration on trapezoidal rail

Steel + Stainless steel | 2-unit or 3-unit row system, can be combined as desired using row connectors

Specifications

Two or three side-by-side hoops made of bent steel tube with a tube diameter of 42.4×2.5 mm, a vertical rear tube and with staggered tube ends with welded on flange. Each stand is screwed onto the trapezoidal rail at an angle of 90° (on request 45°), which can be connected at both ends to form a row.

Mounting

· Row system on trapezoidal rail (see page 138)

Finish

- Stainless steel 1.4301 smoothed, grain 240
Optional: electropolished/high-gloss
- Steel S235, galvanised with powder coating in standard RAL colours or DB 703
- Other colours available on request at a surcharge

Installation example: combination of 2 and 3 rack row system

		Double rack	Triple rack	Row connector
450-1 Row configuration	Steel S235, galvanised	450.201	450.301	450.901
450-1 Row configuration	Steel S235, powder-coated	450.211	450.311	450.903
450-1 Row configuration	Stainless steel 1.4301	450.202	450.302	450.902

BICYCLE-STAND 478 BOROFIX

Steel + wood (protection for the bike)

Specifications

ABES 478 bicycle stand, 60 x 12 mm consisting of two vertical flat steel bars and a horizontal wooden lath that connects the two bars at the upper end.

Fastening

- removable with BOROFIX (page 154/155)
- concrete embedment
- version with two flanges to enable screwing
- also as a row system on trapezoidal rail

Construction

- S235 steel, hot-dip galvanised with powder coating in standard RAL colours or DB 703
- Wooden rail made of robinia (72 x 35 mm)
- With crossbar for leaning scooters or children's bicycles against on request: stainless steel 1.4301 and sanded to grain or electropolished
- Other material thicknesses, colours, heights and widths are available on request and at extra cost

		For concrete embedding	With flanges to enable screwing
Bicycle-Stand 478 without knee rail	Steel S235, galvanised	478.001	478.040
Bicycle-Stand 478 without knee rail	Steel S235, powder-coated	478.101	478.140
Bicycle-Stand 478 without knee rail	Stainless steel 1.4301	on request	on request
Bicycle-Stand 478 with knee rail	Steel S235, galvanised	478.001.q	478.040.q
Bicycle-Stand 478 with knee rail	Steel S235, powder-coated	478.101.q	478.140.q
Bicycle-Stand 478 with knee rail	Stainless steel 1.4301	on request	on request

2025

BICYCLE-STAND 479 BOROFIX

Steel + plastic (protection for the bike)

Specifications

Bicycle-stand made of rectangular, mitred and welded steel profiles 80x 20mm, including two-sided leaning protection for bicycle frames made of HDPE (black plastic profile).

Fastening

- removable with BOROFIX (page 154/155)
- For screwing on with two flanges
- For embedding in concrete

Construction

- Steel S235, galvanised
- Optional with powder coating in standard RAL colours or DB 703.
- Other colours are available on request and at extra cost

SCOOTER PARKER 400

Steel

BOROFIX

Specifications

U-shaped folded flat steel with an additionally welded-in, horizontal flat steel girder to which five cantilevered, circular and movable gripper arms are attached next to one another. The gripper arms, which can be locked by means of standard locks through overlapping openings, serve as holders for both classic scooters and e-scooters up to a max. handlebar diameter of 75 mm.

Can be combined with ABES Bicycle-Stand 453, 471, 472 and 474

Fastening

- removable with BOROFIX ((page 154/155)
- concrete embedment
- version with two flanges to enable screwing

Construction

- Steel S235, galvanised with powder coating in standard RAL colours or DB 703
- With crossbar for leaning scooters or children's bicycles against on request: stainless steel 1.4301 and sanded to grain or electropolished
- Other material thicknesses, colours, heights and widths are available on request and at extra cost

COAT GUARD FOR BICYCLE RACK

Ø 42 & 48 MM

Plastic

Specifications

Protects the leaning bracket/bicycle rack and the bicycle from scratches and damages of the surface.

Fastening

- For adhering yourself
- can be combined with ABES Bicycle-Stand
- Ø 42: 450-1/2, 452, 476, 477, 480
- Ø 48: 470

Construction

- 9005/jet black

Note:

- also suitable for retrofitting

2025

BOROFIX: 2025

PATENTED FASTENING SYSTEM FOR ABES BICYCLE-STAND*

*BASIC COMPONENTS OF THE BOROFIX FASTENING SYSTEM:***GROUND SLEEVE INCLUDING CLAMPING WEDGE (Fig. 1):**

A flexible and at the same time stable fixation of the bicycle stand is ensured by concreting the ground sleeve flush with the ground.

In combination with the screw and clamping rosette, the clamping wedge pre-installed in the ground sleeve produces the clamping effect by tightening.

Standard: hex socket head screw. (Fig. 1a) Alternatively: maximum protection against theft with ABES screw with drop-shaped drive (Fig. 1b: protected by utility model 20 2017 104 290.)

CLAMPING ROSETTE (Fig. 2):

Is inserted into the ground sleeve together with the leaning hoop. Forms a force-fit connection in conjunction with the clamping rosette. The bike-stand does not wobble and has no play.

EXAMPLES OF COMPATIBLE LEANING BRACKETS (Fig. 4):*OPTIONALLY AVAILABLE:***GROUND SHELL COVER (Fig. 3):**

It covers the ground sleeve flush with the ground after removal of the bicycle stand. See clamping rosette for fastening.

DECORATIVE ROSETTE (Fig. 5):

Use of a decorative rosette to cover the clamping rosette. Can also be retrofitted.

*BOROFIX ground sleeve with clamping wedge and clamping rosette: protected by European patent: EP 3 608 484 B1

PRINCIPLE:

- BOROFIX is a fastening system in which a force-fit connection is achieved through the interaction of the bicycle-stand, clamping rosette and ground sleeve with a clamping wedge.
- Clamping take place by firmly fixing the bicycle-stand, clamping rosette and ground sleeve to one another by tightening the clamping screw.
- Result: The bicycle-stand sits in the ground sleeve without play and can be removed quickly at any time.
- **BOROFIX: INNOVATIVE AND SECURE**

1 Insertion of the bicycle-stand in the ground sleeve...

2 ... with clamping rosette

3 Clamping sleeve cover (bicycle-stand removed)

4 removable bicycle-stand

5.1 OPTIONAL: Decorative rosette for ...

5.2 ...a particularly aesthetic appearance

CHARGING STANDS made of rectangular steel profile

Steel + Stainless steel

Specifications

CHARGING-STAND 690 with one socket

Stand made of rectangular steel profile (60 × 60 mm), mitred and welded, with a Type F socket (each 230 V, 16 A, IP54) fitted on the inside of the post for connecting an e-bike.

CHARGING-STAND 691 with three sockets

Stand made of rectangular steel profile (60 × 60 mm), mitred and welded, with three Type F sockets (each 230 V, 16 A, IP54) fitted on the cross tube for connecting e.g. e-bikes.

Finish

- Stainless steel 1.4301 smoothed, grain 240
Optional: electropolished/high-gloss
- Steel S235, galvanised with powder coating in standard RAL colours or DB 703
- Other colours available on request at a surcharge
- Profile dimensions, heights and widths other than specified are available on request and at an additional cost
- Optionally with knee rail

Mounting

- Concrete embedment, For concrete embedding
- Alternative: version with two flanges to enable screwing
- Option: removable with ground shells

Technical information

Power supply:	230 Volt DC
Power rating:	16 A
IP Code:	IP54

Notes

- Electrical configurations on demand at an additional cost.
- Other technical components, such as a residual-current circuit-breaker (FI), controls or cables, are not included in the scope of delivery.
- The fuse protection and connection must be carried out on site by a specialist firm.

Can also be supplied as a bicycle stand without sockets

- Can be used for example as a charging station for e-bikes.
- Type F (Schuko) mains sockets incl. fixing material included in delivery.

Type F sockets included in delivery are fitted on site into the openings provided.

CHARGING-BOLLARD 665 with three sockets

Steel | 900 mm

Specifications

Rectangular steel bollards with a flat locking top part, prepared for fitting three Type F sockets (each 230 V, 16 A, IP54) for connecting e-bikes, for example.

Mounting

With flange to enable screwing

For concrete embedding

Finish

- Steel S235, galvanised with powder coating in standard RAL colours or DB 703
- Height can be adjusted on customer request

Technical information

with regard to a Type F (Schuko) socket

Power supply: 230 Volt DC
Power rating: 16 A
IP Code: IP54

Notes

- Electrical configurations on demand at an additional cost.
- Other technical components, such as a residual-current circuit-breaker (FI), controls or cables, are not included in the scope of delivery.
- The fuse protection and connection must be carried out on site by a specialist firm.

Identical with Bollard 065, see p. 65 and Lighting-Bollard 265 LED, on p. 77

- Can be used for example as a charging station for e-bikes.
- Type F (Schuko) mains sockets incl. fixing material included in delivery.

PARKLANDS & CITY

Green spaces perform important functions in the public area: They contribute to a pleasant micro-climate, serve as places of recreation and rest for people and make every townscape prettier.

Love heart: As an alternative to bridge railings, our love heart can be used by couples who want to express their feelings for each other by attaching padlocks

Bicycle-Stand

Attractive and safe routing in the city center.

Planters

Shrubs, small trees and other plants in the city.

Tree-Guard

For the protection of trees or plantings.

ABES „Heart“

Signs of love with hanging locks.

ABES „HEART“ 940

Steel

Specifications

ABES Heart 940 is a heart-shaped bent and welded steel construction with welded-in wave-shaped round bars intended for hanging „love locks“.

Fastening either for setting in concrete or removal from a ground sleeve incl. clamping device.

Mounting

concrete embedment or removing from a ground sleeve.

Finish

- Steel S235, galvanised
- Optional Aluminium with powder coating in standard RAL colours or DB 703
- Other colours available on request at a surcharge

3P-TECHNOLOGY

Ground shells (cast iron, galvanised)

Ground shell 300 mm*
(standard for 3p-Technologie)

000.001

Ground shell 500 mm *
for additional stability with unstabilised subsoil,
cobblestone pavement etc.

000.003

Ground shell 100 mm
as special solution in case of small mounting
depth, e.g. car parks, bridges etc.

000.007

Junction pieces w. predetermined breaking point (cast iron, galvanised)

Junction piece without anti-roll device
(standard for 3p-Technologie)

000.008

Junction piece with anti-roll device
After a collision with a vehicle, the metal rod
prevents the bollard to roll away.

000.013

Junction piece w. anti-roll device + cable slot
for LED lighting bollards
The metal rod prevents the rolling away of the
bollard after a collision with a vehicle

000.017

Junction piece with short anti-roll device
for ground shell 100 mm (000.005)
The metal rod prevents the rolling away of the
bollard after a collision with a vehicle

000.018

Junction piece extended version
for 3p-High
Allows to open and close the locking
mechanism with long fire brigade triangular
keys without offsets

000.016

*Also available with anti-roll device

000.040

Junction piece 3p-Flex (without cable slot)
The bollard returns to its initial position after
impact (8-10° tilt), and only breaks if the breaking
load is exceeded.

000.015

Junction pieces w/o predetermined breaking point (cast iron, galvanised)

Junction piece w/o predetermined breaking point
Solid protection for people and objects.
Does not break in case of an impact.

000.034

Height-adjustable junction piece
Height can be adjusted with a threaded rod
Compensates for the gap between bollard and
ground shell, if it ends below level, e.g. with
paving stones of different heights.

000.041

Clamping cone sets (stainless steel 1.4301)

Clamping cone set with hex head screw
(standard for 3p-Technologie)
N1 + N2 + hexagonal head screw

Screws and clamping cones (stainless steel 1.4301)

Hexagonal head screw
spare part, M12, length 80 mm

000.009

Triangular head screw
spare part, M12, length 75 mm

000.019

ABES Bolt - Teardrop shaped
special asseccory, M12, length 75 mm

000.035

Cover caps (pair), for hexagonal head screw
grey or black, *plastic*

000.006

Clamping cone N1*
spare part, without internal thread

N1.000

Clamping cone N2*
spare part, three-slotted and with internal thread
(suitable tool see next page: 000.029/000.026)

N2.001

* Hybrid shell socket for 3p-technologie & 3p-Snaplock

	Clamping cone N4 lengthened, for protection by a padlock	N4.000
	Clamping cone N5 lengthened, for protection by a padlock	N5.000
Ground shell covers		
	Ground shell cover cast aluminium, powder-coated in DB 703	000.002
	Ground shell cover with ressort steel S235, galvanised	000.050
Tools		
	Nut for triangular head screws M12, stainless steel 1.4571	000.027
	Nut for ABES Bolts - Teardrop shaped stainless steel 1.4571	000.037
	Nut with 3-pin adapter to tighten the clamping cone N2.001 stainless steel 1.4571	000.029
	Socket wrench for triangular head screws robust design	000.024
	Socket wrench for ABES Bolts - Teardrop shaped robust design	000.036
	Socket wrench with 3-pin adapter to tighten the clamping cone N2.001 robust design	000.026
	Triangular key simple, with short holder, M12 x 75 mm	000.011
	Triangular key simple, with long holder, M12 x 160 mm	000.014
Ground rosettes (steel S235, galvanised, powder-coated in bollard paint)		
	Ground rosette for <u>Bollard 032</u> with 3p-Technologie	000.032
	Ground rosette for <u>Bollard 066</u> with 3p-Technologie	000.066
	Ground rosette for <u>Bollard 014</u> with 3p-Technologie	000.030

BOLLARDS

Chains & accessories (galvanised, powder-coated in bollard paint)

	Chain 8 x 52 mm sold per meter	000.100
	Eylet	000.200
	Shackle	000.300
	Chainlink for eylet	000.303

Special models

	Bollard 001, 5 rings red painted RAL 3020/9016	000.301
	Bollard 008 + 010, 1 ring red painted RAL 3020/9016	000.302
	1 ring of reflective foil 100 mm wide; red, white or red/white	000.321
	2 rings of reflective foil 100 mm wide; red, white or red/white	000.322
	3 rings of reflective foil 100 mm wide; red, white or red/white	000.323
	Cat's eye reflectors affixed reflectors	000.326
	Finished with logo individual production	000.327
	1 cutting of reflective foil 100 mm wide; red, white or red/white, self-adhesive, for manual installation	000.328
	Reflective foil sold by the meter 50 mm or 100 mm wide; red, white or red/white, self-adhesive, to apply individually	on demand
	Powder coating except standard RAL colours free of charge for more than 9 bollards in the same colour	000.310

ACCESSORIES

Stainless steel – surface treatments		
	Smoothed e. g. grain 240 (standard)	000.410
	Electropolishing (high-gloss)	000.420
Special coatings		
	Long-lasting phosphorescent coating Maintains fluorescent properties permanently	on demand
GENERAL		
BOROFIX (mounting system for leaning brackets, park benches, etc.)		
	Ground sockets (pair) 453 (required for removable version) also available for bike parkers 452, 470, 471, 472, 474, 476, 477, 478, 480 and park bench 15	458.002
	Clampig rosette (pair) 458 Steel S235, galvanised	458.005
	Steel S235, galvanised, powder-coated (RAL or DB)	458.007
	Stainless steel 1.4301, ground to grain (required for removable version) for bicycle stands 452, 453, 470, 471, 472, 474, 476, 477, 478, 480 and park bench 153	458.006
	Ground shell cover (pair) Steel S235, galvanised (optional for removable version) for bicycle stands 452, 453, 470, 471, 472, 474, 476, 477, 478, 480 and park bench 153	458.003
	Decorative rosette (pair) Steel S235, galvanised	458.008
	Steel S235, galvanised, powder-coated (RAL or DB)	458.009
	Stainless steel 1.4301, ground to grain (optional for removable version) for bicycle stands 452, 453, 470, 471, 472, 474, 476, 477, 478, 480, 153 (optional)	458.010
Fastening system for leaning bracket 450-1, 450-2 and 451		
	Ground shell for removable model for Bicycle-Stand 450-1 and 450-2 galvanised	456.002
	Ground shell for removable model for Bicycle-Stand 450-1 and 450-2 steel S235, galvanised	455.001
	steel S235, galvanised, powder-coated in RAL or DB	455.011
	stainless steel 1.4301, smoothed, grain 240	455.002
	Ground shell for removable model for Bicycle-Stand 451 galvanised	456.003
	Cover plate for Bicycle-Stand 451 steel S235, galvanised	455.003
	steel S235, galvanised, powder-coated in RAL or DB	455.013
	stainless steel 1.4301, smoothed, grain 240	455.004
Ground sockets for round tubes		
	Ground shell, ø 48 mm for standard tube with diameter 48 mm (e.g. for Tree-Guard 662)	600.200
	Ground shell, ø 60 mm for standard tube with diameter 60 mm	600.201
	Ground shell, ø 76 mm for standard tube with diameter 76 mm	600.202
Key for waste containers can		
	Triangular key for waste containers standard	500.003
Clean & care products		
	Ceramic grease aerosol	on demand
	Assembly paste	on demand
	Touch-up paint (RAL or DB colour) correct small defects in the product's coating	on demand
Color Fans		
	RAL K7 CLASSIC colour fan containing 213 RAL CLASSIC colours	000.341
	DB Glimmer Grey fan TL / TP-KOR steel structures attachment H - colour cards, 14 shades	000.340

* also available for round tube with Ø 42 & 48 mm

EXPLANATION OF SYMBOLS & TENDER SPECIFICATIONS

< Explanation of symbols & tender specifications

All presentations and descriptions in the brochure, as well as the product models and properties, including the 3p-Technology, are given for information purposes only.

Due to the unpredictability of daily usage, no guarantee can be given for the described product properties. All products have been carefully developed for a tough everyday use and are built accordingly robust.

We reserve the right to make technical or optical amendments without prior notice at any given time or when we believe this serves the further development and improvement of our products.

"ABES" and "3p-Technology" are registered word and figurative trademarks.

BOROFIX is a registered word mark.

DELIVERABLE MOUNTING VARIANTS

- **With 3p-Technology**
Removable with 3p-Technology. Comprising a 300 mm ground shell, junction piece with predetermined breaking point (without anti-roll device), one clamping cone with internal thread, one clamping cone without internal thread and a hex head bolt as a standard.
All bollards (except feeder bollards) can be supplied with 3p-Technology.
- **With 3p-Technology for LED lighting bollards**
Comprising a 300 mm ground shell, junction piece with predetermined breaking point, anti-roll device and cable slot, one clamping cone with internal thread, one clamping cone without internal thread and a hex head bolt as a standard.
- **With 3p-Technology "3p-High"**
Removable with 3p-Technology.
For the use of long fire brigade triangular keys without offsets.
Is basically possible with all bollards. Extended junction piece required for 3p-High.
- **With 3p-Snaplock (self-latching)**
Removable with 3p-Snaplock.
Optionally with triangular or cylinder lock.

- **Fixed mounting**
- **Screw-on** (with flange)
- **Removable with ground shells**
- **Fold down**
- **Free standing** (for benches)
- **with socket(s)**
- **with socket(s)**

- **Available as a row system on trapezoidal rails** (for bicycle stands)

FINISH

- **Products made of cast aluminium**
Powder coating in standard RAL colours or DB 703
- **Products made of steel S235***
Steel S235, galvanised with powder coating in standard RAL colours or DB 703
- **Products made from stainless steel 1.4301***
Stainless steel 1.4301 pickled and smoothed, grain 240
Optional: electropolished/high-gloss

Other colours available on request at a surcharge.

Only for bollards: Accessories and special requirements such as different colours, red and white paint, reflective film or powder coating of chains, rings, shackles, etc. in the same colour as the bollard are available on request at a surcharge
(except feeder bollards and Bollard 026)

*For bollards, the height can be adjusted individually (except feeder bollards)

- **The ground rosette is part of the delivery (3p-Technology)**
Completely covers the ground shell, material: S235 steel, hot-dip galvanised and powder coated in bollard paint

- **With LED Light unit**

- **Available in the online shop as a 3D model and for AR**
